## **OPTIMA E-FLUSH PRESSURE REGULATOR** FOR DRINKING-SYSTEMS

## SELECTION AND VERSIONS

The diagram shows a central yellow pressure regulator with various accessories labeled 1 through 11. To the right, three breather options are shown with their respective lengths: 450 mm (8), 600 mm (9), and 900 mm (10).

LUBING pressure regulator with 450 mm <b>8</b> breather		With actuator		Without actuator	
Hanger	Connection	Übergangsstücke vom Druckminderer auf:			
		<b>1</b> 22 x 22 mm square tube	<b>2</b> 28 x 28 mm square tube	<b>1</b> 22 x 22 mm square tube	<b>2</b> 28 x 28 mm square tube
Small	Front	3255-01-00	3256-01-00	3255-00	3256-00
	Middle	3255-03-00	3256-03-00	3255-02-00	3256-02-00
<b>5</b> Turkey profile	Front	–	3252-01-00	–	3252-00
	Middle	–	3252-03-00	–	3252-02-00
<b>6</b> Aluminum profile	Front	3251-01-00	–	3251-00	–
	Middle	3251-03-00	–	3251-02-00	–
<b>7</b> Round pipe profile	Front	3253-01-00	3254-01-00	3253-00	3254-00
	Middle	3253-03-00	3254-03-00	3253-02-00	3254-02-00

**Optional accessories:**

- 3** Transition piece to 3/4" hose: Art. No. 3306-00
- 4** Transition piece to 3/4" round pipe: Art. No. 3305-00
- 11** Shut-off valve: Art. No. 3325-00

All pressure regulators can be equipped with 600 mm [-6] **9** and 900 mm [-9] **10** breathers in addition to the standard 450 mm **8** breather. For this purpose, the part numbers before -00 are extended by the corresponding variant number [-6 or -9]. Example: 3254-02-**6**-00

## AUTOMATIC FLUSHING

### Version with actuator for automatic flushing

Optional screw-in actuators for automatic flushing: The LUBING flush control „LCW Touch Control“ sequentially switches the actuators which open the integrated flush valve of the Optima E-Flush pressure regulator. The required voltage is provided by the LCW control in 24 V DC. The cable length of the actuators of 7,5 m ensures flexible handling. Manual flushing remains possible even with actuator.

with actuator for automatic flushing

without actuator, manual flushing
