MAIN WATER SUPPLY AND DOSER

MAIN WATER SUPPLY

The LUBING main water supply combines a water meter, pressure-reducing valve, water filter and doser in one pre-assembled unit. The components are connected by flanges, allowing quick maintenance and replacement.

The main water supply is available with 3/4"-, 1"- and 1 1/4" connections as well as with mechanical or electric dosers. For electric dosing, the E-Dos and E-Dos Touch versions are available in different sizes and performance levels.

A 1" version with mechanical doser (in bypass)
B Electric doser "E-Dos"

MIXER ITEM 4248

The LUBING Mixer, item 4248, with a capacity of 60 litres keeps the water and medication in motion throughout the entire dosing process. This prevents deposits, blockages and leaks in valves and pipelines.

The required amount of water is filled through inlet A. Once the specified quantity has been reached, the supply hose is connected to float valve B. The doser then draws the medication solution proportionally into the drinking line.

The lid features an opening for the suction hose. Once dosing is complete, fresh water is supplied automatically to flush the mixer and the doser.

A Water inlet
B Float valve for fresh-water supply and flushing

VERSIONS

The versions differ in connection size, maximum flow rate and dosing system.

Version	Perm. pressure range	Max. flow rate without doser	Flow rates with doser				
			Item 4237-1: 0,2 to 2,0 %	Item 4238-1: 1,0 to 5,0 %	Item 4239-1: 3,0 to 10,0 %	Item 4288: 1,0 to 4,0 %	Item 4289: 0,2 to 2,0 %
3/4"	0,3 - 4 bar	2.500 l/h	15 - 2.500 l/h	15 - 2.500 l/h	15 - 2.500 l/h	5 - 2.500 l/h	–
1"		4.000 l/h	15 - 2.500 l/h	15 - 2.500 l/h	15 - 2.500 l/h	5 - 2.500 l/h	–
1 1/4"		8.000 l/h	–	–	–	–	500 - 8.000 l/h

ADVANTAGES

- » Pre-assembled unit with all essential components.
- » Easy maintenance thanks to flange connections.
- » Flexible configuration with different connection sizes and dosing systems.
